# uPVC Windows

 The Glass Fix Group supplies a choice of stylish uPVC window systems to enhance your home and improve your energy efficiency rating. All offer a smooth finish, slimmer sight lines and excellent thermal performance with better acoustic levels. They can be made to fit on to cills or installed directly to an opening. The uPVC windows are available in several styles including casement windows, tilt and turn windows, bay windows and sliding sash windows.

Want something other than white uPVC? Choose from the RAL range of colours to create a statement and display a stylish look for your property. Our recent dual colour profiles allow you to select different colours to show outside and inside to perfectly match your décor.

## Energy efficient

Our uPVC windows will benefit your home to become more energy efficient and reduce your heating bills. Our uPVC profiles can achieve the higher 'A' rating when fitted with proper glazing units and installed by approved fitters.

## Low maintenance

Replacement windows that we manufacture from quality uPVC profile comprise of an exceptional compound that ensures a smooth, sleek finish. It maintains the original appearance with only little maintenance without warping or rotting over time.

## Greater security

Using high quality rigid uPVC profiles with multi chambers offer added strength to provide security for your windows in your home. Our window systems are manufactured according to the PAS 24 standard which is security tested against intruders.

## Improved performance

Tested to meet the high BS7412 standard for manufactured window and the BS6375 standard for withstanding external elements. With proven acoustic performance, our double glazed windows reduce noise levels in your property by up to 50%.

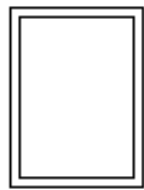

## Safe and secure

 Our windows have been designed to protect against intruders and keep your property safe from forced entry. A burglar is unable to remove the glass units from the outside as all our glassware are internally beaded for extra deterrent. Although, we include high quality and approved locking mechanisms on our uPVC windows, you can specify extra security options such as shoot bolts, anti-tamper security hinges, reinforced frames and premium locks.

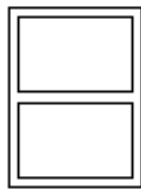

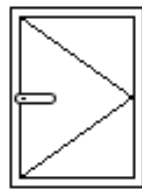

**Casement style options** - Casement windows are versatile in that they can be ordered in a range of styles and a variety of colour options. They can feature fixed panes, side or top openers, and can have other hardware integrated, i.e. fanlights. See below for examples of how the uPVC windows can be specified.

## Flush sash windows

 If you are looking for a different frame style from the usual chamfered straight edge or sculptured design, then consider the modern flush sash framework.

With no lip from the sash and the outer frame, you get a flush looking appearance when the window is closed. This smart streamlined appearance is a growing trend in homes today and can be optioned in contemporary colours or in traditional woodgrain finishes.

## Bow and bay windows

 Enjoy our high quality, secure and draught free windows created to fit as bow or bay style windows in your home. The level of simulated space and light is designed to open up your living area to the outdoors. For further enrichment, you can specify slim sightline frames to maximise your glass space and allow more natural light to enter indoors.

## French windows

 uPVC French double opening windows are understated products that can make a bold statement when complemented with certain properties. When the twin sash openers are open, you can really let the fresh air in and refresh your room. Be rest assured that French windows are also great to use as a fire escape, particularly on higher ground. There are many finishes to choose from to ensure that the right window is made for your home.
